

PPA Launches Data Buoy

Spring 2016

In collaboration with Prof. Holly Ewing of Bates College (on left in photo, with Phil Boissonneault, in Pete Leitner's boat) PPA has launched a data buoy at the "deep hole" of Panther Pond. This buoy will continuously record water temperature, and (later) dissolved oxygen, to further the studies of [gloeotrichia](#) and overall lake health. Boaters and water skiers are asked to avoid the buoy. Please alert your neighbors. For further information, please contact PPA or Prof. Ewing.
