DESCRIPTION OF PROJECT: _____

PLEASE FILL OUT ANY PART WHICH APPLIES TO JOB. PROPER PLANS MUST ACCOMPANY FORM.

Owner _____ Phone _____

Location of construction (address) _____

Contractor _____ Phone _____

Address _____ Proposed use _____

Est. construction value (including labor) _____ Past use _____

TYPE OF USE: _____

TYPE CONST: _____

PROPOSED USE: _____

CODE _____

Subdivision Y N

Subdivision _____

Building dimensions L _____ W _____ Total square feet finished _____ Total square feet unfinished _____

of stories _____ # of bedrooms _____ Lot size _____

Provided Setback Front _____ Back _____ Side _____

FOUNDATION:

- Type of Soil _____
- Footing size _____
- Foundation _____
- Other _____

CEILINGS:

- Ceiling Joists Size _____
- Ceiling strapping Size _____ Spacing _____
- Type of Ceiling _____
- Insulation type _____
- Ceiling Height _____

FLOORS:

1. Sill size _____ Sills must be anchored _____
2. Girder size _____
3. Lolly column spacing _____ Size _____
4. Joist size _____ Spacing _____
5. Bridging type _____ Size _____
6. Floor sheathing Type _____ Size _____
7. Other material _____

FLOORS:

- Truss or Rafter Size _____ Span _____
- Sheathing Type _____ Size _____
- Roof covering Type _____

CHIMNEYS:

Type _____ Number of fireplaces _____

Exterior Walls:

- Studding size _____ Spacing _____
- Number of windows _____
- Number of Doors _____
- Header sizes _____ Span _____
- Bracing Yes _____ No _____
- Corner post size _____
- Insulation type _____ Size _____
- Sheathing type _____ Size _____
- Siding type _____ Weather exposure _____
- Masonry materials _____
- Metal materials _____

Interior walls

- Studding size _____ Spacing _____
- Header size _____ Span(s) _____
- Wall covering type _____
- Fire wall if required _____
- Other materials _____

PLUMBING:

- Approval of soil test if required: Yes _____ No _____

The person actually doing the plumbing must get the Plumbing Permit.

DIG SAFE PERMIT NUMBER _____

SWIMMING POOLS: MUST BE FENCED IN.

- Type _____
- Pool size _____ Square Foot _____
- *MUST CONFORM TO NATIONAL ELECTRICAL CODE AND STATE LAW

SIGNATURE OF APPLICANT _____ Date: _____

SIGNATURE OF C.E.O. _____ Date: _____

CERTIFICATE OF OCCUPANCY REQUIRED. YES _____ NO _____

INSPECTION BY LIFESAFETY REQUIRED. YES _____ NO _____

Town of Raymond Energy Compliance Certificate

- This Certificate illustrates the minimum listing requirements if IECC 401.3.
- This Certificate must be posted on or in the electrical distribution panel. It shall not cover or obstruct the visibility of the circuit directory panel, service disconnect label, or other required labels.
- The Certificate shall be completed by the builder or registered design professional.
- The Certificate shall list list the predominant R-values for insulation listed below. Where there is more than one value for each component, the Certificate shall list the value covering the largest area.
- The Certificate shall list the types and efficiencies of the heating, cooling and service water heating equipment.
- Where a gas-fired unvented room heater, electric furnace, or baseboard electric heater is installed in the residence, the Certificate shall list all those as appropriate. Efficiencies for the appliances shall not be listed.

<u>Area</u>	<u>R-Value</u>	
Ceiling/Roof	_____	
Walls	_____	
Foundation (Slab, basement wall, crawl space wall and/or floor)	_____	
	<u>U-Factor</u>	<u>SHGC</u>

Cooling System	_____	_____
Service Water Heating	_____	_____
	<u>Yes</u>	<u>No</u>
Gas-fired unvented room heater installer	_____	_____
Electric furnace installed	_____	_____
Baseboard electric heater installed	_____	_____

ACKNOWLEDGEMENT OF SHORELAND ZONING BUFFER STANDARDS

This sheet provides notification of standards required by the Town of Raymond Shoreland Zoning Provisions. By signing this form, the applicant acknowledges understanding of the standards; agrees to comply with them; and to notify all others associated with the proposed project of these restrictions. Violations of any of these standards will require the contractor(s) and/or landowner(s) to fully restore any site conditions found not in compliance to their pre-construction conditions.

NOTE: This form summarizes key Ordinances provisions. Other restrictions and Maine DEP requirements also apply. Approval of a DEP permit under Natural Resources Protection Act (NRPA) does not supersede these standards, which, in some cases, are more restrictive. See Section 14 of the Shoreland Zoning Ordinance for more information about which activities require a local permit, and Section 15 details the standards that apply to those various activities.

The following standards apply within the buffer area (within 100' of the normal high waterline of great ponds and rivers flowing to great ponds; within 100' of the normal high water line of other rivers and zoned streams; and within 100' of the upland edge of zoned wetlands. NOTE: However, that other standards apply at distances greater than the buffer width. See the Official Raymond Zoning Map to determine how a particular parcel is zoned):

- One (1) winding foot path of no more than six (6) feet in width is allowed for each lot. A winding path is required in order to provide opportunities for water to disperse into the buffer.
- Structures are not allowed within the buffer area, except for water-dependent structures. This prohibition includes but not limited to storage buildings, boathouses, patios, decks and tent platforms.
- Vegetation less than three (3) feet in height cannot be removed, killed, or otherwise damaged.
- In the off-season, temporary docks should be stacked on the footpath to avoid damage to buffer vegetation, or removed from the buffer area entirely.
- Fill cannot be brought into the buffer area except for path construction or to re-vegetate bare ground as part of an approved re-vegetation plan. Path construction material must consist of washed stone, bark mulch, or other material that will not wash into the water.
- Pruning of tree branches is permitted on the bottom 1/3 of the tree.
- Openings, or view corridors, in existence prior to January 1, 1989 can be maintained but not enlarged.
- Openings that have "closed" with growth of woody vegetation, cannot be "re-opened."
- Grandfathered buildings within the buffer may be expanded after obtaining a permit, if the expansions are no closer to the water body than the original structure. Such expansions of floor area and/or volume are limited to 30% of the floor area and volume in existence as of January 1, 1989. Before any construction begins, pre-construction photos must be taken. Silt fence or other erosion control measures must properly be installed, at the upland extent of the buffer area, below any construction.
- No disturbance of the ground cover (including the duff and leaf layer) or vegetation shall be caused within the buffer. Equipment movement and excavation must be carefully controlled to avoid any impact to the buffer. For example, it is not permissible to locate a foundation at the buffer limit if that placement will cause any disturbance within the buffer. The placement of silt fence at the buffer limit is intended to prevent disturbance within the buffer and to satisfy state and local requirements.
- Clearing of vegetation and timber harvesting must not remove more than 40% of the volume of trees in any ten (10) year period. The creation of cleared openings is prohibited and a well-distributed stand of trees must be maintained. These provisions may limit the percentage of cut to less than the specified maximums.
