NOTE: A building permit is required for ANY new construction or addition, including decks, sheds, dish antennas, and any alterations or renovations involving structural change. Any construction in conformance with the regulations that occurs without a permit will result in a double permit fee or a minimum of \$500.00 plus \$5.00 per square/cubic foot. Up to a maximum of \$2,500 may be charged.

By state law the setback from the high water mark is measured in a straight line from the closest point of normal high water to the closest extension on the building, which could be the front of a deck or the most outward point of the eaves.
