Inland Fisheries and Wildlife Review
Jordan Bay Marina, Sebago Lake - Raymond, ME

Dear Mr. Perry:

Sebago Technics, Inc. has been retained by Port Harbor Marine, Inc. to assist with the design and permitting of a dock expansion project located at 1328 Roosevelt Trail in Raymond, ME on Sebago Lake. As part of this process, a review of the site by the Maine Department of Inland Fisheries and Wildlife for any areas that support rare, threatened and endangered species, designated essential and significant wildlife habitats, and fisheries habitat is needed.

For your reference, I have enclosed a project location map. At your earliest convenience, please review and forward your findings. If you have any questions on this project, please do not hesitate to contact me at kramsell@sebagotechnics.com or on my direct line at (207) 200-2098. I look forward to hearing from you.

Sincerely,

SEBAGO TECHNICS, INC.

RE: Information Request –Jordan Bay Marina dock expansion Project, Raymond

Dear Kendra:

Per your request received on December 16, 2019, we have reviewed current Maine Department of Inland Fisheries and Wildlife (MDIFW) information for known locations of Endangered, Threatened, and Special Concern species; designated Essential and Significant Wildlife Habitats; and inland fisheries habitat concerns within the vicinity of the *Jordan Bay Marina dock expansion* project in Raymond.

Our information indicates no locations of Endangered, Threatened, or Special Concern species within the project area that would be affected by your project. Additionally, our Department has not mapped any Essential or Significant Wildlife Habitats or fisheries habitats that would be directly affected by your project.

Fisheries Habitat

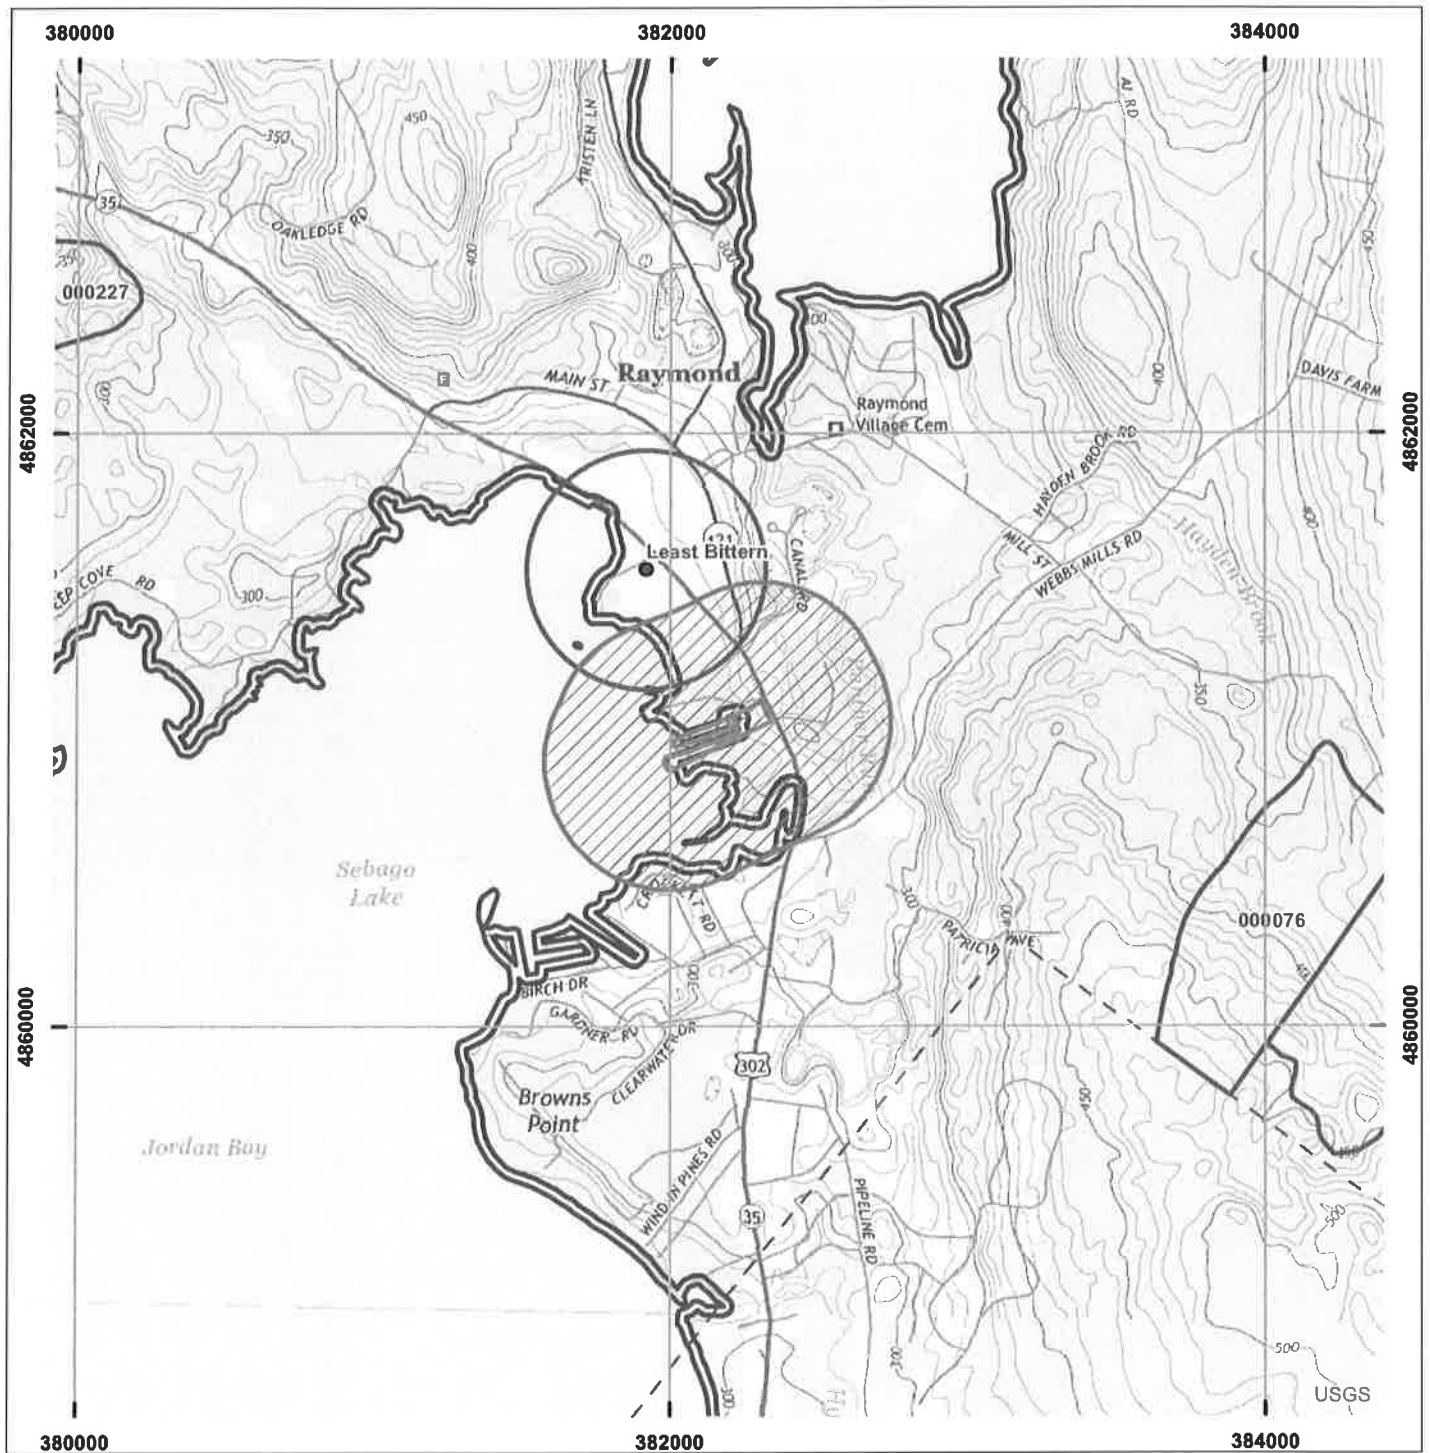

Buffers should be measured from the edge of waterbodies or associated fringe and floodplain wetlands. Construction Best Management Practices should be closely followed to avoid erosion, sedimentation, and other impacts as eroding soils from construction activities can travel significant distances as well as transport other pollutants resulting in direct impacts to fish and fisheries habitat. In addition, we recommend that any necessary in-water work occur between July 15 and October 1.

This consultation review has been conducted specifically for known MDIFW jurisdictional features and should not be interpreted as a comprehensive review for the presence of other regulated features that may occur in this area. Prior to the start of any future site disturbance we recommend additional consultation with the municipality, and other state resource agencies including the Maine Natural Areas Program, Maine Department of Marine Resources, and Maine Department of Environmental Protection in order to avoid unintended protected resource disturbance.

Please feel free to contact my office if you have any questions regarding this information, or if I can be of any further assistance.

Best regards,

Becca Settele
Wildlife Biologist

Environmental Review of Fish and Wildlife Observations and Priority Habitats

Project Name: Raymond, Jordan Bay Marina dock expansion (Version 1)

Maine Department of
Inland Fisheries and Wildlife

Projection: UTM, NAD83, Zone 19N

Date: 12/18/2019

ProjectPoints	Deer Winter Area	Roseate Tern
ProjectLines	LUPC p-fw	Piping Plover and Least Tern
ProjectPolys	Cooperative DWAs	Aquatic ETSc - 2.5 mi review
ProjectSearchAreas	Seabird Nesting Islands	Rare Mussels - 5 mi review
	Shorebird Areas	Maine Heritage Fish Waters
	Inland Waterfowl and Wading Bird	Arctic Charr Habitat
	2008 lwwh - Shoreland Zoning	Redfin Pickerel and Swamp Darter Habitats - buffer100ft
	Tidal Waterfowl and Wading Bird	Special Concern occupied habitats - 100ft buffer
	Significant Vernal Pools	Wild Lake Trout Habitats
	Environmental Review Polygons	Maine Cliff and Talus Areas
