

**Semi Annual Report of Project Canopy Forest Management Plan
for the Town of Raymond**

October 25, 2011
by Gregory Foster

Forest management plans for two forest properties owned by the Town of Raymond are in the process of being prepared. Following is the status of each lot.

Files property, eighty three acres

Fifty three timber inventory point sample plots have taken randomly over this lot
Information about wildlife and other property features has been gathered
Two forest types have been identified and mapped (in draft form)
A timber inventory and other silvical data has been generated from this data
Information about property line location and corners has been gathered
Natural Area and Archaeology and Historic Resources information has been
received from the State of Maine
The written management plan and associated final maps will be completed at the
conclusion of gathering the data on the Patricia Drive property.

Patricia Drive Property, one hundred forty acres

Seventeen of the anticipated seventy one plots have been taken
More than half of the property lines have been located, along with three corner
markers
Natural Area and Archaeology and Historic Resources information has been
received from the State of Maine
The written management plan and associated final maps will be completed at the
conclusion of gathering the data.
